

GOOD NEWS FOR SNORERS

It is a simple fact - everybody knows someone who snores

Snoring is a major cause of sleep deprivation for the bed partner, often the whole family.

As a result there is considerable tension, arguments and bad feeling within the relationship.

Over time, snoring can become the cause of a relationship breakdown, sometimes leading to divorce.

Snoring cannot be stopped at will.

It is caused by a physical abnormality that needs to be identified before a control can be found.

**How many times have you heard:
'I have tried everything, but nothing works?'**

**The good news is - there is a control for everybody.
Finding the cause is the key to finding a solution.**

Facts & Figures about snoring:

15 million snorers in the UK.

Snoring affects 30 million people in the UK.

10.5 million are men & 4.5 million are women.

58% of snorers are aged between 50-59 years.

Men snore louder than women.

82% of bed partners regularly leave the bedroom because of snoring.

57% of those sleep in another bedroom, 43% sleep on the sofa.
