Acusnore™
Anti Snore
Magnetic Nose
Clip

Why do people snore?

There are many reasons why people snore. The most common is called "*simple snoring*" brought on by tiredness, stress, obesity, drink, nasal or sinus problems, and even your sleeping position.

During sleep the mouth and throat muscles relax. The tongue can drop and the vibration of the uvula during the sleeping cycle can translate to snoring.

Instructions:

Expand the nose clip and push the clip into the nostrils until it is positioned comfortably into place.

Safety Warning:

Keep out of reach of children.
Only use as directed.
Do not share.
Clean after several uses.
